

Jackie,

I assume that Mike meant that I schedule TSRA/C5RA/HM&ERA for PAC through SURFPAC N4/N6. I am also responsible for FTSCPAC event team assignments. The primary reason Terry Couch wants me to accompany Nick Nocon (LCE) is because I have deckplate experience with "FAST" and can try to answer questions germane to the assessment process using "FAST".

V/R

Freddie

Mike,

Thanks, for the update. Was really hoping to get this sooner, but if this is the best you can do, so be it.

Freddie,

What does "Freddie can discuss the ship assessment schedule needs and schedules the team as well" mean?

Thanks, Jacki

Jackie, et al

I just received word from FTSCPAC that Terry Couch wants to send Nick Nocon (LCE SD) with Freddie Camacho (FTSCPAC Code 90) to meet with the N6 team. They will travel from San Diego on Monday, 8/18 and return to San Diego on Thursday, 8/21.

While there, Nick will provide tech assist while your team tests the FAST program and Freddie can discuss the ship assessment schedule needs and schedules the team as well.

Please contact Terry Couch directly if you would like to change this schedule or desire other arrangements.

Best Regards,

Mike

Andrea/Mike,

I understand the install didn't take place on Friday. Can you give me an idea of when this will take place.

FTSC PAC has asked CNSL to name a test ship. I won't do that until we have had a chance to test the software.

Thanks, Jacki

I have a database for the FFG-58 (S. B. Roberts), as requested, but a date and time has not been set up yet as far as I know. Please let me know a date and time that would be convient for you. Thanks.

BASED ON THE DISCUSSIONS AT OUR MEETING, I THINK IT IS SKED FOR
FRIDAY AM. ANDREA, PLEASE CONFIRM.

Thanks
Mark

Mark,
When will the FAST contractor's be installing the software at CSC
and provide a Dbase to test the program?
Thanks, jacki
