

Report for week ending 01-31-03

1. FAST now resides on the LCE San Diego server and is available for demonstration on a username and password basis. Send Keith Conway an e-mail at [keith.conway@lce.com](mailto:keith.conway@lce.com) to get directions how to use the web-based program.
2. Chandler Gabel has the standard statements working on the 2-Kilo editor.
3. Chandler will work with FTSCCLANT (Mark Kiser) next week to install the latest version of FAST on the FTSCCLANT server.
4. Keith met with FTSCPAC 402 this week and is working on the Order Part module. He plans to have something to demo in a week or so.
5. FTSCPAC demonstrated the web-based program to RADM Brooks this week (1-30-03) accessing the LCE San Diego server with an ordinary web browser from the FTSCPAC conference room.

Best regards,

John Spencer
