

Report for week ending 02-07-03

1. Keith Conway got some important work accomplished this week on tracking which 2-Kilos have been loaded on a disk for upload into the ship's SNAP/OMMS system.
2. Keith has also made good progress on the Order Parts module after spending time with FTSCPAC Code 402 personnel to determine their requirements.
3. Keith will be working with Kirk Gillard (FTSCPAC) to conduct a mock ship visit this week using data from USS Mobile Bay.
4. Chandler Gable continues to work on getting the FAST Program on the FTSLANT Server and on NMCI certification.
5. Terry Couch has established some guidelines for access to FAST on the web. We will not be able to process requests for usernames and passwords at this time. Requests for usernames and passwords should be sent to Kirk Gillard at FTSCPAC.
