

Report for week ending 12-06-02

1. Keith Conway now has FAST "feeding" two databases, the FAST database and a legacy database, to allow for testing in January. The legacy database will be discontinued once FAST is tested.
2. Keith also added a feature that will allow the user to create list of systems to be tested. This is an important part of the user interface.
3. Keith is working on another feature that will allow FAST to save previous visits for editing and reuse. This feature will greatly reduce the time it takes a user to prepare for a visit.
4. Chandler Gable now has the 4790-CK editor functional
5. Keith is going to meet with Jimmy Elkins (FTSCPAC code 402) next week to test the SNAP upload feature.
6. We continue to make good progress on FAST documentation.

Best regards,

John Spencer
