

Report for week ending 10-11-02

1. Keith Conway worked on the User Interface this week.
2. Keith conducted an initial User Interface Design meeting with Kirk Gillard, Bob McKinley and Chad Jensen (LCE) on 8 & 9 October. He displayed some working trial screens for the 2K editor and received feedback on their utility.
3. Keith met with folks from NWAS to discuss FAST and how NWAS can assist us in using FAST to send TSP data to NWAS. They seemed very cooperative and helpful.
4. Keith prepared the initial draft of the presentation he will be giving in Norfolk next week at the Critical Design Review.
5. Chandler Gable continued working on the CK editor.
6. We got a connection to the CDMD-OA database.
7. The Critical Design Review will be in Norfolk at 0800 on Thursday October 17th (at FTSC/LANT).

It was encouraging to finally get access to the 3M and CDMD-OA databases.
